THE RATE (UAE Dirhams)

There are no tiers and no minimum. Any amount, from any investor, is on the same rate. The rate for each month is set from the company's actual monthly income — a strong month sits at the top of the band, a quieter one nearer the floor. It never falls below 70% and never rises above 80%.

ANNUAL PROFIT — THE SAME RATE FOR EVERY INVESTOR

70% – 80%

FIXED AND GUARANTEED • MINIMUM 70% • MAXIMUM 80%

HOW YOU RECEIVE YOUR PROFIT

- Profit is earned every month, from the day the investment is made.
- First payout at month 3 — it carries months 1, 2 and 3 together as one amount.
- From month 4 onward you are paid every month, for the rest of the two years.
- At the end of 2 years your full capital is returned automatically. Profit closes with it.
- Capital is held for the first 6 months. After that you may request it back on 60 days' written notice; profit runs to the day it is paid, then ends.

IMPORTANT: The rate is fixed and guaranteed between 70% and 80% a year.

70% is the floor. Your profit cannot fall below it in any month, whatever the company's month looked like. 80% is the ceiling; a strong month cannot carry it higher. Both figures are written into the agreement you sign. Where a currency other than the one you invest in is shown, the conversion is indicative — the rate on the day of investment is the one that applies.
